

SAP IBP

TRAINING COURSE

Why SAP IBP

Integrated Planning: Demand forecasting, inventory control, and sales operations planning (S&OP)24 are just a few of the business planning functions that the system provides a single, integrated platform for. Through process integration, SAP IBP removes the difficulties of using disparate, disjointed systems, enabling departments to collaborate toward shared goals.

Enhanced Efficiency: SAP IBP increases operational efficiency by streamlining business operations. Organizations can save time and concentrate on more important endeavors by automating manual operations and decreasing errors.

Scalability and Flexibility: Because of the platform's scalability, firms may adapt their resources to changes in demand. This flexibility helps businesses manage their supply chain operations without spending extra money during slow periods, which is helpful during busy periods.

Execution Capabilities: Beyond planning, integrated supply chain management tools in SAP IBP facilitate successful strategy execution. This entails controlling supply reactions, keeping an eye on performance in real-time, and optimizing inventory levels.

Roles for SAP IBP Professionals in the industry

E-Learning Access

Get the Accessibility to the video content, assessments, and tools and techniques.

Placement

Upon the successful accomplishment of the course, We provide you with 100% Placement Support for 1-year.

Certification

Get Course completion Certification for the SAP IBP Course and Showcase your expertise.

Industry Endorsed Curriculum

This course will help you to master SAP IBP Skill And learn Supply Chain, Interface, Demand Planning, Supply Planning, and more.

MODULE-1

Supply Chain IBP- Overview

- Introduction to IBP
 - ERP IBP Overview
 - ERP IBP System Walkthrough
 - Web UI- Fiori App
 - Excel UI
 - Modules of IBP and their license
 - Business process understanding of IBP Modules and flow.
 - Supply Chain Concepts Mid-Term, Short-Term, Long-Term Planning
 - Understanding of Baseline and Scenarios
 - Hub and Spoke Model in Supply Chain and Planning flow
 - Time series Planning
-

MODULE-2

Inter face

- CPI -DS Interface for time series extraction
 - CPI-DS Extractions from ECC tables
 - Data sources
 - Project, Task, and Data flows
 - Production and Quality environment for Data Sources
-

MODULE-3

Master Data- Demand Planning & Supply Planning

- Product
 - Location
 - BOM
 - Recipe
 - Production Versions
 - UOM and unit of measure conversion
 - Currency and Currency Conversions
 - Location Product
 - Location Source
-

MODULE-4

Configuration

- Attributes
 - Master Data
 - Time Profiles
 - Planning Area
 - Planning Levels
 - Key Figures
 - Planning Operators
-

MODULE-5

Data Integration Jobs

- Loading of the Master Data into IBP
 - Loading of the Transaction Data into IBP
 - Understanding the load Analysis in the Planning Views
-

MODULE-6

Demand Planning

- Demand Planning Process
 - Supply Chain Network
 - Master Data Requirements
 - Transactional Data Requirements
 - Creating First Demand Planning View
 - Key Figures for Demand Planning
 - ABC/XYZ Classification
 - Outlier Correction (Manual/Auto)
 - Statistical Forecasting
 - New Product Introduction
 - Consolidation of Demand Plan through scenarios
 - Copy Operators
 - Release Demand Plan to Supply
 - How to compare IBP with APO DP
-

MODULE-7

Charts & Dashboards

- Create the first Analytics chart
 - Adding charts to Dashboards
 - Using charts and dashboards filters to navigate
-

MODULE-8

Inventory Optimization

- Master data for Inventory Optimization
 - Global (multi-stage) inventory optimization
 - S&OP Overview; Process Management
-

MODULE-9

Supply Planning

- Supply Planning Process
 - Supply Chain Network
 - Master Data Requirements
 - Transactional Data Requirements
 - Check Mode and S&OP Heuristics set up
 - Generating unconstrained supply run
 - Creating Supply Planning Views
 - Working with EPM Formatting
 - Generating Customer Quota through Forecast
 - How to work with Adjusted KFs?
-

Certification Process

1

COUNSELLING

Start your SAP IBPCourse. Get in contact with the best us to choose the best batches for yourself.

2

ATTEND THE TRAINING IN SAP IBP COURSE

Get the SAP IBP from our well-experienced instructors and complete the course Certification. Take help from our Documented Video Sessions in case you missed any sessions or you want to run through the topics again.

3

SUBMISSION OF PROJECTS ASSIGNED

Develop your knowledge while doing the hands-on projects assigned by the instructors during the certification for Assignments and to get the certification.

4

TRAINING COURSE

Appear for Global Certification exam & get the SAP IBP Certification from SAP in the fore of your name. You can use it on your social networking sites, to interact with experts in the same field.

SAP recognizes

Sujay Desai

is certified as
